Big Impact
Better World

Dear Grade 3 Families,
Welcome to the second issue of our Grade 3 Newsletter!

Our Grade 3 journey is getting busier, brighter, and even more exciting! Every week brings new questions, interesting discoveries, new challenges, creative ideas, and plenty of moments to celebrate.

From “Aa ha!” moments and “I’ve got this!” victories to moments of curiosity and wonder, our learners have been busy thinking, exploring, creating, collaborating, and making meaningful connections.

So, come along as we share a little peek into the curious, energetic, and ever-growing world of Grade 3.

What we are learning...

Joyful Arrival

Our Joyful Arrival is a beautiful celebration of friendship, energy, and togetherness! Every morning, students take the lead in spreading smiles as they greet one another with cheerful welcomes, lively dances, joyful recitations, fun activities, and creative surprises.

From energetic moves to confident voices and heartwarming greetings, every moment creates a sense of belonging and excitement. It's a wonderful way for students to connect, express themselves, and begin the day with happy hearts, positive energy, and a joyful spirit!

Reading – Where Every Book Opens a New Adventure

Our reading corner has become our classroom's little escape hatch! 📖✨ During DEAR and reading time, students disappear into stories, travel to faraway places, meet curious characters, and occasionally forget that the real world is still waiting outside the book! From discovering new words to sharing “You have to read this!” moments with friends, every book brings a new adventure. Our young readers are not just turning pages—they’re growing ideas, imagination, confidence, and a lifelong love for books, one story at a time!

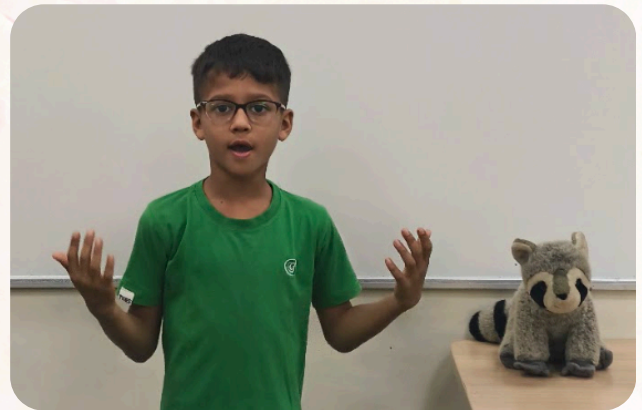

What we are learning...

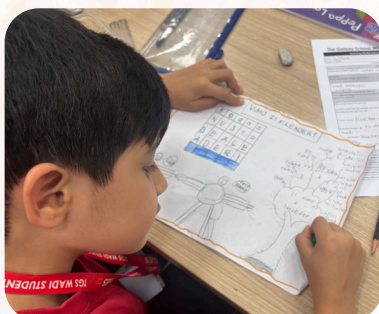

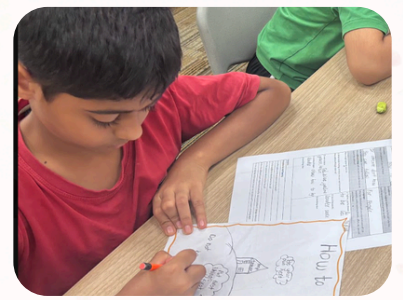

Daily Class Recitation

We begin our day with Daily Recitation, 🎤 giving each learner an opportunity to present a poem they are learning. Students recite individually and receive encouraging, personalised feedback 🌟 from their advisors, helping them build confidence, fluency, expression, and speaking skills 🗣️🌟 One poem at a time! 🌱

LIM - Leader In Me

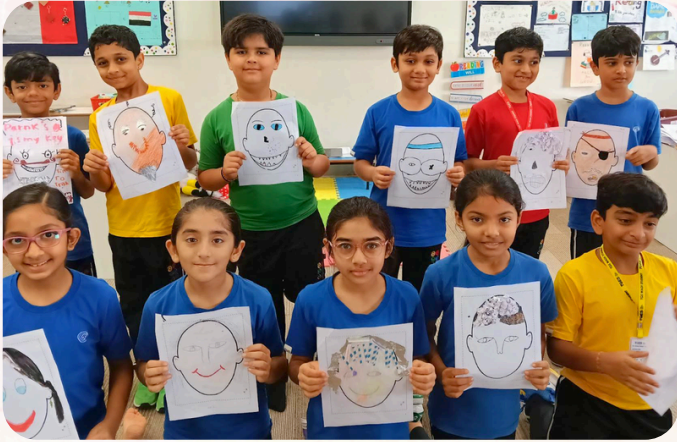

As part of our Leader In Me journey, Grade 3 students explored what makes a good leader. They created “What Makes a Good Leader?” posters and connected the 7 Habits to situations they experience at school and at home. Through their drawings and explanations, students shared examples of skills such as listening to others, showing empathy, taking responsibility, and working as a team.

What we are learning...

Literature

Our learners stepped into the wonderfully tricky world of “The Man Whose Trade Was Trick” 🧐📖 and became little literary detectives! 🔍 They followed the twists and turns of the story, uncovered surprises, asked curious questions, shared predictions, and discussed the characters’ clever choices. With every new trick, they sharpened their thinking and discovered that sometimes a story can be just as puzzling as a mystery—especially when trickery is the trade! 😊✨

English

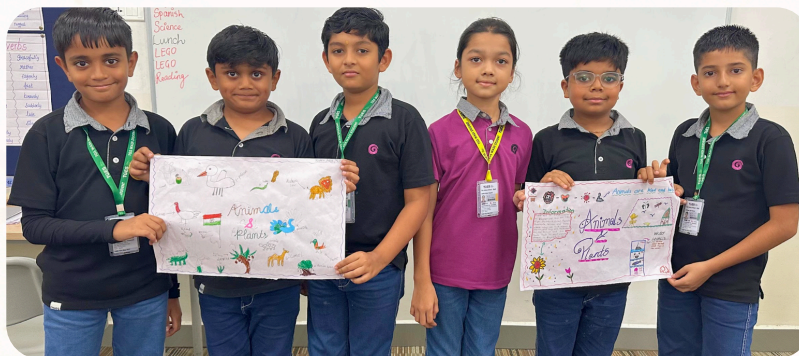

Our young learners explored different story hooks 🧐📖 and selected their favourites to spark their imagination ✨. Working collaboratively in groups 🤝, they developed and elaborated on their chosen hooks, adding characters, settings, and exciting details 🧐🌍 to bring their story ideas to life! 💡📖✨

What we are learning...

Social Science

Our learners set off on an exciting adventure to discover their very own state—Gujarat! They travelled through its rich history and fascinating geography, admired colourful traditional attire, explored delicious Gujarati foods (and tried very hard not to eat the pictures! 😊), and learnt about Gujarat's state bird and state animal. To bring it all together, our young explorers got creative and designed colourful murals and mind maps packed with facts, ideas, and imagination. From the Rann of Kutch to the roar of the Asiatic lion, our learners discovered that Gujarat is full of stories, colours, flavours, and surprises—and learning about it was full-on Gujarati masti! 💛

What we are learning...

Art

Our learners let their imaginations run wild through a series of exciting art adventures! 🎨 ✨ They played with colours, textures, shapes, and different art techniques, turning simple ideas into wonderfully unique creations. With brushes, colours, and plenty of creativity, every artwork became a little window into their imagination. Along the way, they also learned to be patient, pay attention to fine details, keep trying when things didn't go as planned, and, most importantly, enjoy the joy of creating! 🌈 🖌️

ICT

Our learners stepped into the digital world and discovered that computers can be much more than just screens and buttons! 💻 ✨ They sharpened their keyboarding skills, created colourful documents and presentations, dipped their toes into the world of coding, and learned clever ways to organise information. Along the way, they became confident digital explorers—learning to think like problem-solvers, work together, communicate creatively, and use technology safely and responsibly. Who knows... we may have a few future coders, designers, and tech wizards in the making!

What we are learning...

French

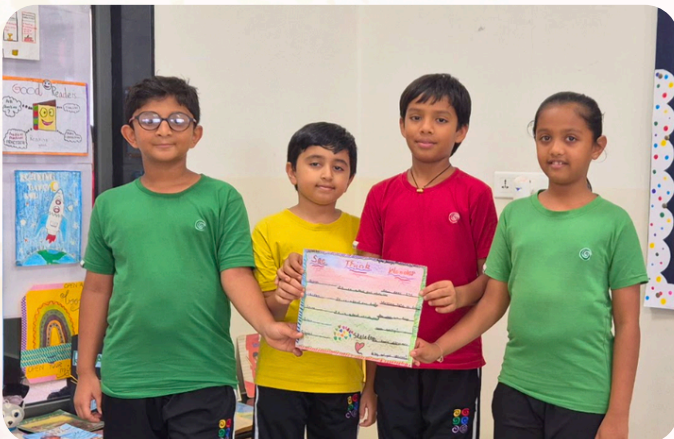

Our French learners joined Pete, the Monster, on a fun-filled adventure around the world! 🌍👾 Through this exciting story, they hopped across continents, sailed over oceans, and discovered fascinating countries—all while picking up new French vocabulary along the way. With Pete leading the way, language learning became an exciting journey of exploration, discovery, and a little monster-sized fun! 🇫🇷✨

Science

🦴 See, Think, Wonder — Our Skeleton Adventure!

Science came alive as our learners became curious bone detectives! 🧐🦴 Through the See-Think-Wonder activity, they carefully observed the human skeleton, shared their thoughts, asked fascinating questions, and let their curiosity take the lead. Working together, they listened to different ideas, added their own thinking, and discovered that sometimes the best answers come when we put our ideas together. From “I see...” to “I think...” and plenty of “I wonder...”, this was a hands-on reminder that great learning begins with a curious mind! 🔍✨

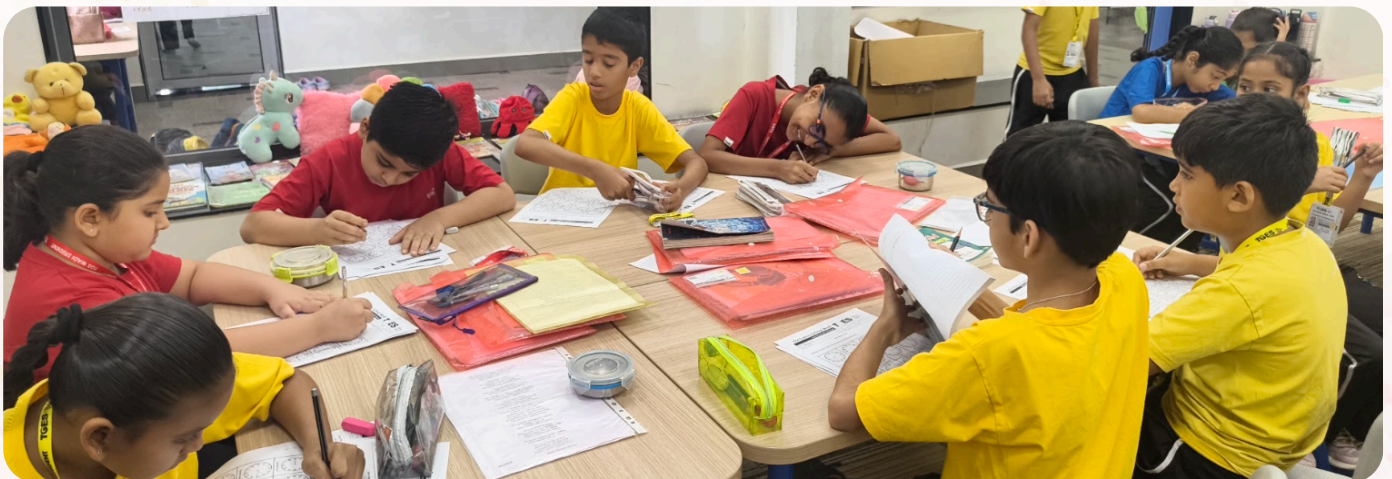

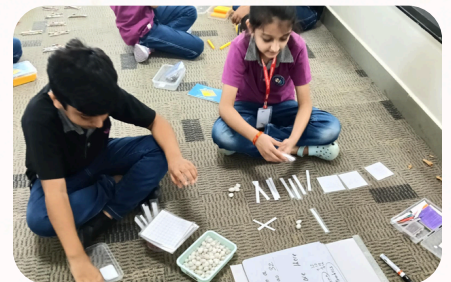

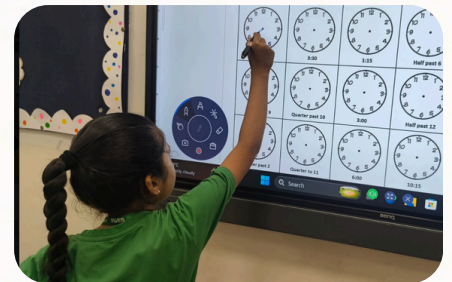

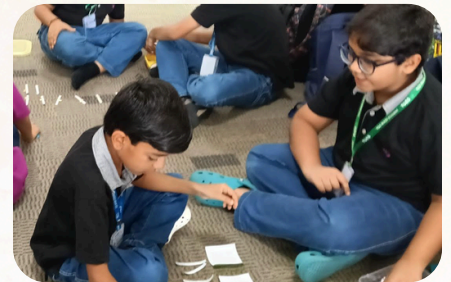

What we are learning...

Mathematics

Our learners became pattern detectives! 🔍

1	2
3	4

 They explored linear and non-linear patterns, spotting how numbers and shapes change and figured out the clever rules hiding behind them. They also got busy mastering multiplication through fun, engaging activities and plenty of practice. From spotting what comes next to tackling times tables, they built greater fluency, accuracy, and confidence—proving that maths is all about finding the pattern, cracking the code, and having fun along the way! ✨÷×

From the Teachers' Desk

Dear Parents,

What an engaging time it has been in Grade 3! 📚 ✨ Our classrooms have been buzzing with curious minds, thoughtful questions, creative ideas, and plenty of "Aa ha!" moments.

Beyond books and lessons, our learners have been growing in many meaningful ways. Through collaborative activities and everyday classroom experiences, they have been learning to listen, share, question, problem-solve, take responsibility, and learn from mistakes 🤝 🌱.

It has been wonderful to watch them become braver thinkers, kinder teammates, and more independent learners. Every question asked, challenge attempted, and mistake embraced is helping them take another step forward on their learning journey. 🚀

Thank you for being an important part of this journey and for continuing to support and encourage your child. ❤️ Together, let's keep nurturing curiosity, kindness, confidence, and a genuine love for learning—because the best learning happens when children are excited to discover what comes next! 🌈 📖 ✨

A vibrant rainbow arches across a blue sky with soft, white clouds. Below the rainbow, a green field stretches out. At the bottom of the image, five diverse children are running and holding hands. From left to right: a girl with purple hair in pigtails wearing a green shirt and blue overalls, holding a green and purple balloon; a girl with dark skin and braids wearing a pink shirt; a boy with brown hair wearing a red and white striped shirt; a girl with blonde pigtails wearing a purple dress with yellow flowers; and a boy with brown hair wearing a red shirt, holding a pink and orange balloon. The children are running on a grassy path with small grey rocks.
