

Grade 6 Gazette

JUNE
JULY

GREETINGS!

Dear Readers,
Welcome to this edition of the Grade 6 Newsletter! This issue brings together the latest updates, achievements, and memorable moments from June and July. From academic highlights and exciting events to student voices, interviews, and upcoming activities, each section reflects the enthusiasm and dedication of our school community. Thank you for reading, and enjoy this edition!

QUOTE OF THE MONTH

From Avadh to Wadi

Stepping into the Wadi Campus as Grade 6 students marked the beginning of an exciting new chapter in our school journey. The shift from Avadh to Wadi has introduced us to new experiences, making learning more enjoyable and interesting.

One of the most fascinating features of the Wadi Campus is its beautiful natural surroundings. The campus is home to countless trees. Among them stands the banyan tree, a special place where we often sit for learning activities. Studying beneath it is a unique experience that makes lessons feel different from a regular classroom.

Another addition to our daily routine is the Garba after brunch. Dancing together every day fills the campus with energy and happiness while giving us a refreshing break before continuing our learning. Sitting with friends makes mealtimes more enjoyable and gives us a chance to spend quality time together.

With its comfortable seating and peaceful environment, it has become a place where not only students come to read or borrow books, but teachers also come to do their tasks.

Our Mission Statement

WITH VOICE,
CHOICE, RESPECT,
AND CARE —

Always learning,
always growing,
always together!

What's New?

History & Geography are separate subjects for us now. History focuses on the civilisations of the past. Civics is also taught with history in Grade 6, which is about our roles, duties, and responsibilities. One notable topic is religion in which we learnt how it evolved, and that we should respect every religion. Geography is all about the Earth. We learnt about natural disasters, such as volcanoes and earthquakes as well as the layers of the earth, and countries, continents and cities.

Kiaara, 6B

The **Science** team has planned exciting learning activities for the June–September term. This term, students will explore the topic ‘Structure and Function’ through fun activities and investigations. Students will study the different cell organelles, including the cell wall, cell membrane, nucleus, vacuole, chloroplast, and mitochondria, and discover how each part helps a cell survive. They will also explore specialised cell, and learn the similarities and differences between plant and animal cells and understand how cells form tissues, tissues form organs, and organs work together in body systems.

Krishiv, 6D

Students have explored factors and multiples along with fraction, decimals and percentage. Application on percent is the latest unit going on in class. Recently, our class played *Taboo* to recap the topics we had learned in **Math**. Instead of simply recalling definitions, we explained key terms without using certain "taboo" words, encouraging critical thinking, teamwork, and effective communication. Activities like these help us make meaningful connections, apply our knowledge confidently, and enjoy learning.

Shivatmika, 6E

What's New?

This year, the **English** curriculum has undergone a significant change. One of the biggest differences is that English and Literature have now been separated into two distinct subjects.

In the last two months, along with a recap of previous curriculum, we have learnt informative article writing, text structures and the making of brochures in English. In Literature, we explored various excerpts and attempted characterization, along with the exploration of Figures of Speech.

Riaan, 6D

Global Perspectives has helped us, as students, become more analytical, think about global issues from different perspectives, and gain a deeper understanding of the global community. Through research, class discussions, and collaborative activities, we have learned to communicate effectively, solve problems, and appreciate diverse viewpoints. Global Perspectives prepares us for real-world challenges and further broadens our understanding of the world around us.

Shravya, 6B

Reading as our WiG

This year, our dedicated reading slots have become an important part of our learning journey. With 20 to 25 minutes dedicated to reading, we are working towards our **Wildly Important Goal** of developing stronger reading habits. In a world filled with technology and AI, these sessions encourage us to connect with books more than AI and discover the joy of reading.

As a class, we explore a variety of books and decide together which book to read next.

The most rewarding part of these reading slots is the opportunity to share our thoughts with one another. Listening to different perspectives deepens our understanding of the stories and often helps us notice ideas we might have missed.

Library Redesign!

Grade 6 students sharing ideas to reimagine and design the library under the guidance of Prina Ma'am.

Book Launch

Imagine 80 minutes in a room with friends, projectors showcasing videos to set the vibe, popular children's books laid out on tables, and, of course, unlimited popcorn supported by unlimited fun!

This is what the Grade 6 students experienced as part of the Book Launch this year! The main purpose was to explore new genres and to help select a common book for reading. In order to encourage further reading, some selected students have also made extraordinary posters about reading, and hung them across Wadi, making the campus buzz with the trend of reading!

Orientation

A Student-Led Beginning to Grade 6

This year, Grade 6 began with a wonderful and unique student-led orientation. It gave us an opportunity to understand the curriculum and expectations for the academic year in a more interactive and engaging way. When asked about their experience, many students shared that they preferred a student-led orientation, as it felt more enjoyable. The experience was so positive that many of us hope to have similar orientations every year.

Behind the successful orientation was the hard work and dedication of every Grade 6 student. From the initial preparations and rehearsals to the final day, each one of us contributed to making the event memorable. Every committee played an important role, from the Documentation Committee capturing the journey, to the Joyful Arrival Committee welcoming everyone with enthusiasm, and the Decoration Committee creating a vibrant atmosphere. The orientation was not just a beginning to our academic year, but also a wonderful lesson in responsibility and collaboration.

SGFI

The School Games Federation of India (SGFI) gives young sports stars a chance to play at the state, national and even international level!

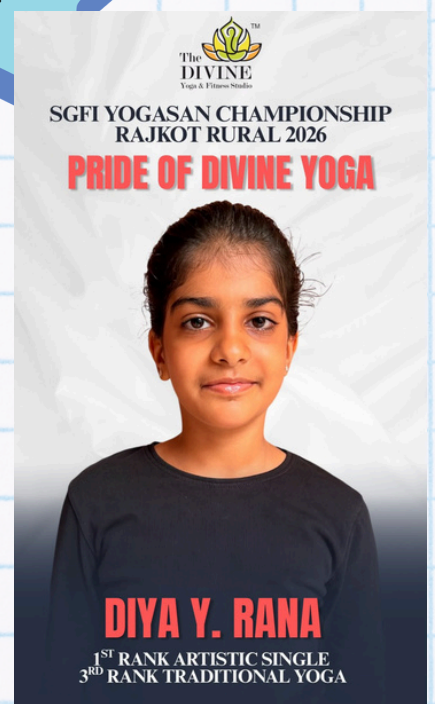

The school sports players are immensely excited to play in the SGFI tournaments. Students from Grade 6 are participating in different sports like football, tennis, volleyball, swimming, and kho-kho. Everyone is working hard.

We interviewed some students on campus to know about their routines. Some students practise at home, some go to academies, and others train at school with Sanjay Sir.

The players are inspired by stars like Ronaldo and Nadal. Some are also inspired (and encouraged!) by their friends and brothers. We feel proud to represent our school. A lot of students are feeling happy but a little nervous too. However, we all agree on one thing: Winning or losing does not matter. The most important thing is to try our best and keep improving our skills!

Special shout
out to Diya
for clearing
the State
Level!!!

Wadi Talks

Recently, our school hosted Wadi Talks: an inspiring event that gave students a platform to share their ideas, experiences, and unique perspectives.

The atmosphere was filled with excitement as speakers confidently took the stage and spoke about topics close to their hearts. It was an opportunity for students to step out of their comfort zones, build confidence, and inspire others through their stories.

Each presentation carried a meaningful message, leaving the audience with valuable lessons and a fresh way of thinking.
