

# Panchtatva Newsletter

August 2026

# SARASWATI PUJA

On the first day of the new academic term, our school began the term on an auspicious note with the celebration of Saraswati Pooja. Students and teachers gathered to offer prayers to Goddess Saraswati, the symbol of knowledge, wisdom, and learning, seeking her blessings for a successful and enriching year ahead.

The ceremony created a peaceful and positive atmosphere, reminding everyone of the importance of education, dedication, and respect for knowledge. It was a meaningful beginning to the school year, inspiring students to approach their studies with enthusiasm, discipline, and confidence.

# Galaxy Cup

Our football team delivered an exceptional performance at the Galaxy Cup, earning the Champions title with remarkable teamwork, discipline, and perseverance. Throughout the tournament, the players displayed great skill, determination, and sportsmanship, bringing pride to the school with their well-deserved victory.

# CHAMPIONS

# Subroto Cup

The Subroto Cup is one of the most prestigious inter-school football tournaments, providing young athletes with an opportunity to compete at a high level. Our team is preparing with enthusiasm and determination, and we look forward to representing the school with pride and giving our very best in the competition.

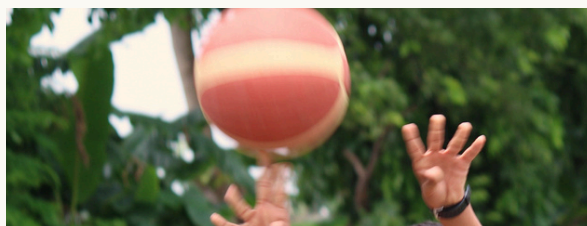

# ***SGFI Selection***

**2026-27**

At the beginning of Term 2, The Galaxy School - Wadi conducted sports selections, allowing students to choose the sport they wished to participate in for the term. Students explored different sporting options based on their interests and abilities before making their choices. The process was smooth and well-organised, helping every student find a sport they enjoy. It will also encourage active participation, fitness, and enthusiasm throughout the term.

# Science Lab Sessions

This term, we were introduced to practical sessions in the science lab as part of the learning experience for students. These practical sessions allow us to explore scientific concepts through hands-on activities, making lessons more engaging, interactive, and easier to understand.

By conducting experiments, students develop important skills such as observation, analysis, teamwork, and critical thinking while applying theoretical knowledge to real-life situations. This new initiative has made science learning more exciting and has encouraged curiosity, creativity, and a deeper understanding of the subject.

Workshops

CancelSave

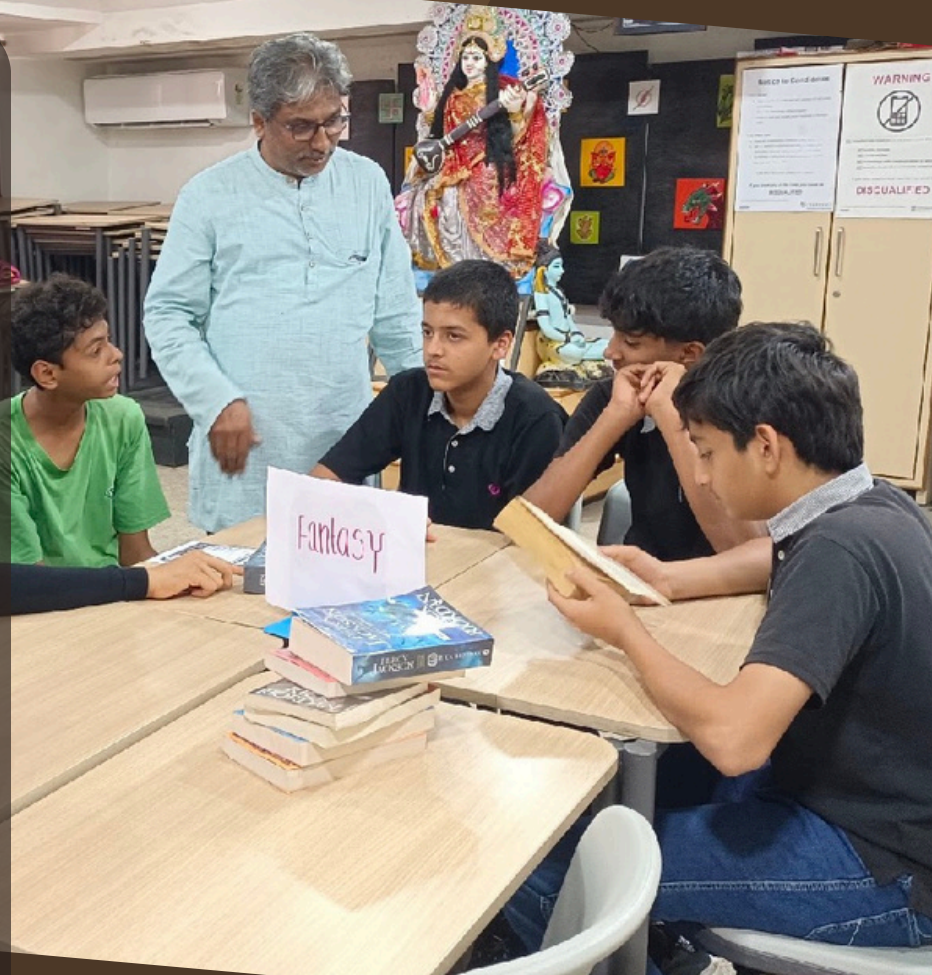

The absolute best part of our week is the moment we drop the textbooks and dive into our creative workshops. Whether you're behind a camera lens, hitting the drums, or sketching a masterpiece, getting to choose our own creative space gives us a taste of pure independence and a much-needed break from the academic grind. This long-running tradition does way more than teach cool skills; it's where we uncover genuine passions and build crucial tools for our future. By pushing us out of our comfort zones, these sessions teach us how to think on our feet, embrace messy trial-and-error, and collaborate with all kinds of personalities—giving us a massive, real-world edge that will help us crush whatever career or path we choose down the road.

# READING LAUNCH

Forget the usual quiet routine – this term, our space was completely transformed into a massive, hands-on layout for our Reading Launch event. With different genre stations packed to the brim with books, we were cut loose to explore, scan summaries, flip through pages, and hunt down our next major hyperfixation entirely on our own terms.

This wasn't just about picking a random title to clear a reading requirement – it was a full-on personal taste test. After diving into the options at each station, we got to rate the contenders and officially lock in our top choice. Tossing out the online algorithm recommendations and actually holding the pages let a lot of us discover genres we never thought we'd touch, setting the perfect vibe for the reading ahead.

STEPPING INTO THE  
REALM OF WORDS.

# International Yoga Day

On 17th June, our grade celebrated International Yoga week with great enthusiasm. Students participated in a guided yoga session, performing various asanas and breathing exercises together.

The session highlighted the importance of physical fitness, mental well-being, and a healthy lifestyle. It reminded us that practising yoga regularly can improve flexibility and overall wellness.

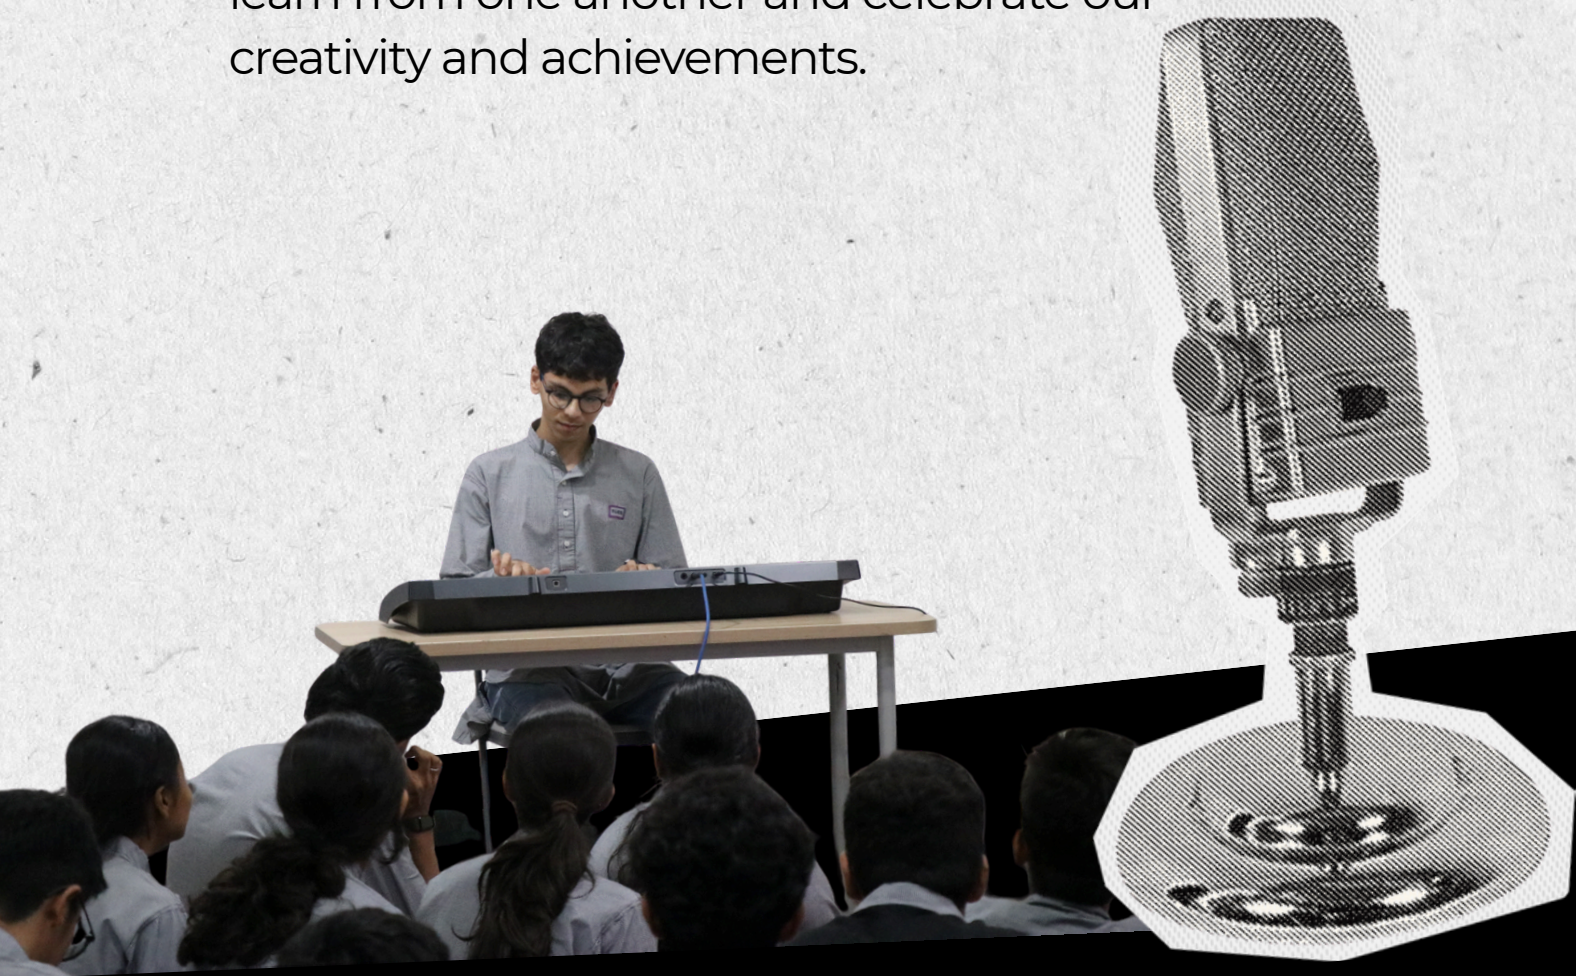

# GRADE ASSEMBLIES

Our grade assemblies give us the opportunity to grow in confidence and showcase our talents. As we progress from reciting in our classrooms to presenting in front of the entire grade, we build our public speaking skills, teamwork, and self-confidence.

Each Thursday, a different section leads the assembly, making it a wonderful platform for us to learn from one another and celebrate our creativity and achievements.

# गुरु पूर्णिमा

On 30 July 2026, The Galaxy School - Wadi celebrated Guru Purnima with a special morning assembly. Students expressed their gratitude to teachers through inspiring speeches, meaningful performances, and thoughtful messages. The celebration reminded everyone of the important role teachers play in guiding and shaping our lives. The assembly created a respectful and joyful atmosphere, encouraging students to value their mentors and continue learning with dedication.

# Wadi Talks

On 23rd July, WADI TALKS 2026 brought together students from across the school to share inspiring ideas and stories. We were proud to see students from our grade take the stage and present their ideas with confidence and passion. The talks covered a wide range of topics, from science and technology to leadership, sustainability, and personal experiences. It was an inspiring experience that reminded us that every voice matters and every idea has the potential to create a positive impact.

## Rain Walk

On 24 July 2026, students of The Galaxy School - Wadi enjoyed a refreshing rain walk as part of a fun-filled celebration. They happily walked, played, and danced in the rain, creating unforgettable memories with their classmates and teachers. Laughter and excitement filled the campus as everyone embraced the pleasant monsoon weather. The joyful experience encouraged students to relax, connect with nature, and enjoy a memorable day together.

Cultivating Relationships, Rigor,  
and Relevance through balanced  
empowerment: merging strength  
with empathy, curiosity with  
discipline, and individuality with  
collective growth.
