THE 7H IMPACT

Habit Heroes

September Edition

Dear Grade 3 Family,

Welcome to the third edition of our Grade 3 Newsletter! This month has been filled with joyful learning, exciting discoveries, and wonderful moments together. We are delighted to share a glimpse of our learners' creativity, curiosity, and achievements. Here's to more learning, laughter, and memorable moments!

Happy Reading!

What we are learning...

Reading

Students enjoyed reading The Wishing Chair by Enid Blyton, following the exciting adventures of the characters and the magical wishing chair. Through the story, they explored character traits, setting, event sequencing, and making predictions. Discussions about the book encouraged students to use their imagination, share their ideas, and respond thoughtfully to the story's events.

What we are learning...

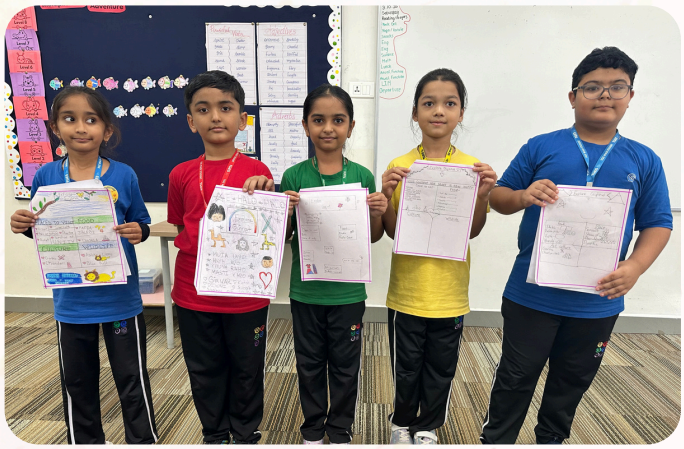

Global Perspectives

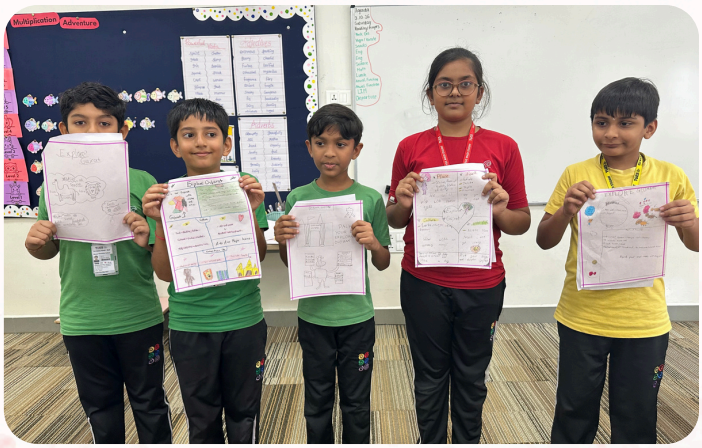

Global Perspectives has been a flavourful journey of discovery! Through engaging discussions and hands-on activities, our young learners explored the food pyramid, discovered the importance of a balanced diet, and learned how different foods help our bodies grow, stay active, and stay healthy. 🥗 They enthusiastically shared their ideas, opinions, and everyday food choices, turning the classroom into a lively space for learning and exchanging perspectives. From sorting foods to thinking about healthy meals, every activity encouraged them to make thoughtful choices and see how food and wellbeing are connected. With curiosity, creativity, and a sprinkle of fun, our learners discovered that eating well is not just about what's on the plate—it's about making choices that help us feel our best! 🍽️

English

Stepping into the shoes of travel marketers, our students crafted persuasive media texts in English class. Through their creative designs, they showcased Gujarat's vibrant culture, majestic wildlife and rich heritage, highlighting the state's unique attractions and inviting tourists to explore its many wonders. Their work beautifully combined creativity, persuasive language and artistic expression to present Gujarat as a destination worth discovering.

What we are learning...

Science

Students explored the fascinating world of energy and learnt about its different forms, including heat, light, sound, and movement. They discovered that energy can neither be created nor destroyed; it can only be transferred or transformed. Through hands-on experiments, such as observing heat transfer from hot water to a glass, students saw how energy moves from one object to another. These experiences helped them connect scientific concepts with everyday phenomena and understand energy in a more meaningful way

Chess Workshop

Our Grade 3 students explored the exciting world of chess, learning how each piece moves and developing their strategic thinking. Through engaging games and challenges, students practised planning ahead, making thoughtful decisions, solving problems, and anticipating their opponent's moves. Chess provided a fun way to build concentration, patience, and confidence while enjoying friendly competition.

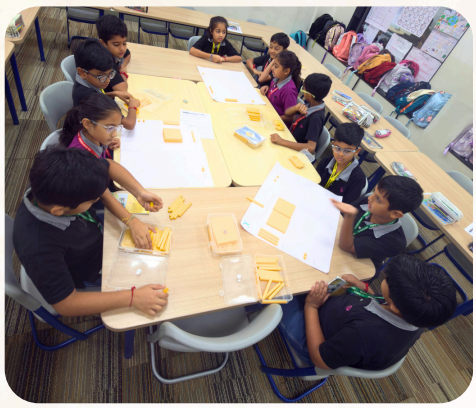

What we are learning...

Mathematics

In Math, students explored two-digit multiplication using hands-on materials. They represented numbers using place-value charts, the *Navnirmiti* Kit and number chips to understand how hundreds, tens and ones combine during multiplication. Through practical activities, they developed a conceptual understanding of the process before moving on to the standard written method. This hands-on approach helped them build accuracy and confidence in solving multiplication problems.

LEGO

Students thoroughly enjoyed their LEGO slots, exploring, building, and learning through hands-on activities. They had fun creating models such as the Boom Barrier 🚧while developing their problem-solving, creativity, and teamwork skills.

What we are learning...

Sports

During sports activities, students practised warm-up exercises, worked together to score goals, and took on challenges that encouraged them to persevere. They developed teamwork and collaboration by communicating with teammates, following rules, and supporting one another. These experiences helped them understand the importance of cooperation, fair play, and healthy competition.

Spanish

Hola! Students explored Spanish by learning new vocabulary, practising pronunciation, and participating in simple classroom conversations. They used familiar words and phrases with confidence, building their speaking and listening skills while gaining an appreciation for a new language and culture.

What we are learning...

Art Corner

During their Art sessions, students explored abstract art by combining geometric shapes, lines and patterns to create their own compositions. They experimented with shapes, colours and arrangements, practised using space effectively, and observed how different elements could be brought together to form an artwork. The activity encouraged them to make independent artistic choices and express their ideas through visual design.

From the Teachers' Desk

Dear Parents,

September has brought another month of learning, exploration, and discovery in Grade 3! Our classrooms continue to be spaces where learners share ideas, ask questions, take on challenges, and learn through meaningful experiences.

Alongside their academic learning, our students have been practising important life skills. Through classroom activities, collaborative tasks, and everyday interactions, they are learning to listen to different perspectives, work together, make thoughtful choices, and take greater responsibility for their learning.

Each new experience offers an opportunity to build confidence, develop independence, and understand that mistakes are a natural part of learning. It is encouraging to see our learners apply these skills in different ways as they continue to grow.

Thank you for your continued support and partnership. We look forward to another month of learning, new initiatives, and shared discoveries as our Grade 3 learners continue to learn, reflect, and grow together.

Warm regards,

Team Grade 3
